

REDUCE YOUR CARBON FOOTPRINT IN 10 STEPS

1

Turning to public transportation by reducing the use of automobiles.

2

Preferring low-emission or electric vehicles instead of passenger cars.

Reducing the shipping distance by choosing regional products.

3

Reducing the carbon footprint of gasoline vehicles by using biofuels.

4

5

Walking or cycling, avoiding unnecessary driving.

6

Build energy efficient homes and businesses or increase the energy efficiency of existing buildings.

Reducing the use of fossil fuels by choosing renewable energy sources

7

To raise awareness of the society and to increase education on sustainability.

8

9

To save energy by turning off unnecessary heating and cooling systems.

10

To recycle waste and increase the recycling rate.
