
WASTE PLAN

5 STEPS

SEPARATE YOUR WASTE.

In all of our destinations, it is preferred to use sorting bins, which replace waste bins.

KEEP RECYCLABLES SEPARATE.

Recyclable materials such as paper, plastic and glass are sent to the waste collection center in separated form.

DO NOT DISCARD ITEMS THAT CAN BE REUSED.

Items that can still be used are examined for usability at various locations and forwarded to institutions that can be evaluated if they cannot be used.

STORE FOOD WASTE IN COMPOST BOXES.

Using the prepared compost, the gardens are composted or donated to a public garden or group.

REDUCE YOUR WASTE AMOUNT AS POSSIBLE.

Disposable plastics or items are not preferred. Reusable products are preferred and smart purchases are made. In addition, incentive programs to avoid disposables are carried out throughout the destination.
